

UNITED
MORE THAN
EVER

The United Way of Northern BC has made an incredible impact both on our organization and the community overall. The United Way in past years has provided essential funding for many of our programs and even more so throughout COVID-19. Through support from them our centre has been able to provide food and essential items to those in need throughout the pandemic and it has made a huge impact on our community. Beyond that through your donations to the United Way in past holiday seasons we have been able to provide struggling families with gifts to put under the tree. It makes a huge impact for families that in other terms may have nothing.

The United Way of Northern BC is not simply providing support to the community, they are the community, and they work every day to make it a better place for everyone!
